

35MM PERMANENT MAGNETIC DRILL

JEFMAGDPER35-110

JEFMAGDPER35-230

This magnetic drill is designed for drilling holes in steel fabrication work. It is an ideal portable drilling solution equally suited for use in building sites or the workshop environment and can be used to cut in horizontal, vertical and overhead positions.

This model features a permanent magnetic locking feature which ensures safe and lasting magnetic adhesion in the event of electrical supply failure. The magnetic base can also swivel to change the angle making it possible to fix to a variety of pipe shapes.

The magnetic drill uses an annular hole cutter (sometimes called a slugger bit) to cut clean and accurate holes without pre-drilling or step drilling. After cutting through the steel the cutter produces a "slug" (a cylindrical lump of steel) that falls from the centre of the cut.

- Maximum cutting capacity 35mm
- Maximum cutting depth: 35mm
- Magnetic Adhesion: 16000N
- Motor: 1600W
- No Load Speed: 700rpm
- Dimensions: 340 x 250 x 430mm
- Weight: 11.5kg

INCREDIBLE 16000N
MAGNETIC ADHESION!
