

HT68 COMPRESSOR OIL (1 LITRE)

JEFOILHT68-1L

A mineral oil based compressor fluid possessing excellent thermal and oxidative stability. It is manufactured using carefully selected mineral oils and inhibitors are added to control oxidation, a problem encountered in the high temperature areas of the discharge zones, and anti-wear additives protect all the mechanical parts in the compressor. It is designed for a minimum 2000 hour service life assuming excessive temperatures are not encountered.

Ideal for use with Jefferson and other air compressor brands
